

# G & L

# RADIO DISTRIBUTION PLATFORM

Trusted by industry leaders

G&L is a managed service provider based in Germany that enables clients of every size to easily distribute their audio and video worldwide.

G&L's radio distribution platform is used by broadcasters of all sizes: from small local radio stations to large media corporations and broadcasters.

Everywhere, on every device, and effectively sustainable: As a member of the non-profit organization RadioDNS, G&L helps to promote the use of open technology standards to enable hybrid radio. Together with the international organization Greening of Streaming, G&L is continuously striving to reduce energy consumption in the streaming industry.
